## DIVIDING DECIMALS

Solve. Be sure to show your work.

| 1                | 2.           | 3.               |
|------------------|--------------|------------------|
| 12 4.56          | 10.5 ÷ 5     | 27 48.6          |
|                  |              |                  |
|                  |              |                  |
|                  |              |                  |
|                  |              |                  |
|                  |              |                  |
| 4.<br>210.8 ÷ 34 | 5.<br>6 9.06 | 6.<br>3,230 ÷ 95 |
| 210.0 1 01       | 0   1.00     | 0)200 1 10       |
|                  |              |                  |
|                  |              |                  |
|                  |              |                  |
|                  |              |                  |

Use your understanding of dividing decimals to solve the questions below.

7. Two students solved the problems below. One of the students made an error. Explain the student's error and how you would help the student get the correct answer.

| M | ARII | ELBI |
|---|------|------|
|---|------|------|

$$18.66\,\div\,3$$

6.33

4.8

8. At the fabric store, you spent \$51.30 for 15 yards of fabric. How much did each yard cost?

9. A product at the grocery store is priced \$12.84 for 6 ounces. What is the cost per ounce?
