## The Unique Producer

Every food chain begins with a producer. Plants are producers. They make their own food, which creates energy for them to grow, reproduce and survive. Being able to make their own food makes them unique; they are the only living things on Earth that can make their own source of food energy. Of course, they require sun, water and air to thrive. Given these three essential ingredients, you will have a healthy plant to begin the food chain.

All plants are producers!

Draw the different producers below.

<b>Apple Tree</b>	<b>Rose Bushes</b>	<b>Watermelon Plant</b>	<b>Grasses</b>
<b>Blueberry Bush</b>	<b>Flower</b>	<b>Fern</b>	<b>Daisy</b>

List the three essential needs that every producer must have in order to live.

Three empty, light gray ovals arranged horizontally, intended for drawing the three essential needs of a producer.
