

EXTRA PRACTICE LESSON 10

SOLVE IT: FACT FAMILIES

Name: _____

Date: _____

Directions: The equations are fact families. Find the value of each shape and fill in the blanks.

A)

$$12 \div \bigcirc = \text{hexagon}$$

$$4 \times \bigcirc = 12$$

$$\bigcirc = \underline{\quad}$$

$$\text{hexagon} = \underline{\quad}$$

The three numbers in the fact family are:

Find two other members of the fact family

C)

$$\bigcirc \div 9 = \text{hexagon}$$

$$\text{hexagon} \times 9 = 45$$

$$\bigcirc = \underline{\quad}$$

$$\text{hexagon} = \underline{\quad}$$

The three numbers in the fact family are:

Find two other members of the fact family

B)

$$\bigcirc \div 8 = \text{hexagon}$$

$$\text{hexagon} \times 8 = 32$$

$$\bigcirc = \underline{\quad}$$

$$\text{hexagon} = \underline{\quad}$$

The three numbers in the fact family are:

Find two other members of the fact family

D)

$$27 \div \bigcirc = \text{hexagon}$$

$$3 \times \bigcirc = 27$$

$$\bigcirc = \underline{\quad}$$

$$\text{hexagon} = \underline{\quad}$$

The three numbers in the fact family are:

Find two other members of the fact family
