

# DIVISION

FINDING: HOW MANY GROUPS?

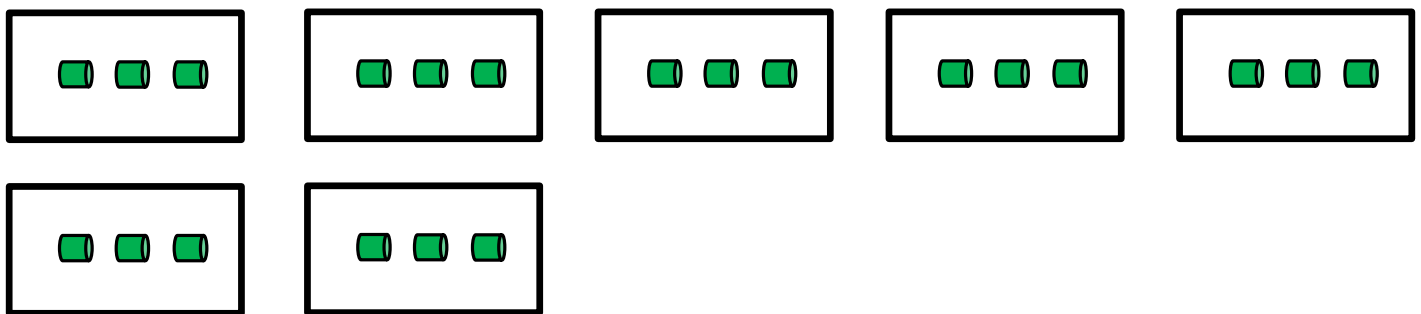

## PROBLEM

Tina is making charms for a necklace. Each charm will have 3 beads. If Tina has 21 beads, how many charms will she make using all the beads?

## WHAT DO WE KNOW?

- Tina is making charms.
- Each charm will have 3 beads. (Number objects in each group)
- She has 21 beads. (Total number of objects)

## SHOW YOUR WORK

**Answer:** Tina made 7 charms.

**Equation:**

$$21 \div 3 = 7$$

the total number of  
objects or beads

the number of  
objects in each group

the number of  
groups or charms
