

# # 4

## SHOW YOUR WORK AND DO YOUR BEST!

1. Evaluate the expression below:

$$3^2 + 5(8 - 3) - 10$$

2. Evaluate the expression below:

$$17 - 3(16 \div 4) + 2^3$$

3. Write a numerical expression below:

a. add 14 and x

b. the product of 6 and y

4. Using the formula below, solve when,  $s = 3$

$$A = 6s^2$$
