

SHOW YOUR WORK AND DO YOUR BEST!

1. Use the coordinate plane to answer the questions:

- The point $(-6, -2)$ is located in quadrant _____.
- If the point $(2, -4)$ is reflected over the x-axis, then it will be in quadrant _____.
- Label point A at $(5, -1)$ and point B at $(-7, -4)$.
- How is $(5, 9)$ different than $(-5, 9)$?

2. Use the number line below to find the value:

- point A _____
- point C is the opposite of point _____
- point _____ is at -2
- two opposite points are _____ and _____
- the opposite of point B is _____
