

# Food Chain Link

For this activity, you are going to create a food chain by linking paper rings together! You can start with the sun on the first link, then create links for the producer and consumers.

Sun → (producer) → (primary consumer) → (secondary consumer)....

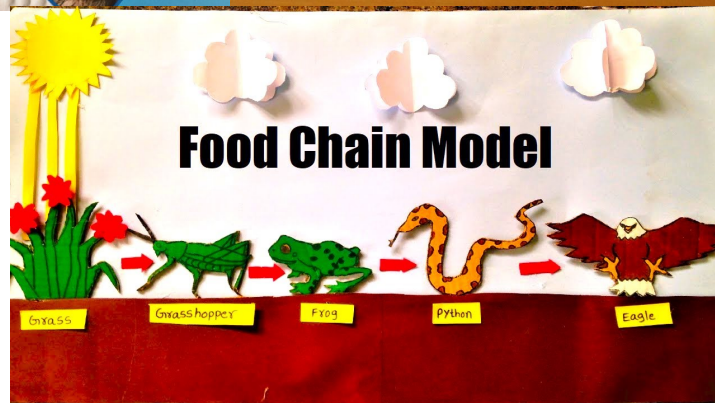

## Directions:

1. Think about something you have recently eaten. Try to create a link leading from the sun to you (as a consumer)!
2. You can use colored paper for each link or white paper, then add color yourself
3. Each link needs to include a PICTURE and NAME of the organism

Example:  
Pictures of each + a name

4. **BONUS POINTS** → Receive bonus points if you get more creative than the links... use your imagination!

# Food Chain Link

## Reflection Questions:

1. Explain the order of your food chain and why it's in that order.

---

---

---

2. In your food chain, what level of consumer are you?

Primary      Secondary      Tertiary      Quaternary

3. Are there any other consumers that might eat the same food as yourself?

---

---

4. What organisms are missing at the end of the food chain?

*(hint: they eat dead things)*

---
