

# # 20

## SHOW YOUR WORK AND DO YOUR BEST!

1. A credit card customer owes \$325.60. They are only able to make a payment of \$120. How much money does the customer still owe?

2. Solve:

a.  $-124 + 56 =$

b.  $32 + (-40) =$

c.  $-18 + (-12) =$

d.  $13.5 + (-20) =$

3. Label the number line with the appropriate equation.

4. Use the number line to model the problem below:

$$-3 + (-1) = -4$$
