

STATION 1

Determine whether the relationship is proportional or not.
Justify your answer.

A

x	4	8	12	16	20
y	3	6	9	12	15

E

x	1	2	3	4	5
y	1	3	5	7	9

C

x	2	4	6	8	10
y	12	24	36	48	60

STATION 2

Determine the constant of proportionality in each of the representations below.

A

x	2	4	6	8	10
y	7	14	21	28	35

C

$$y = 2.75x$$

D

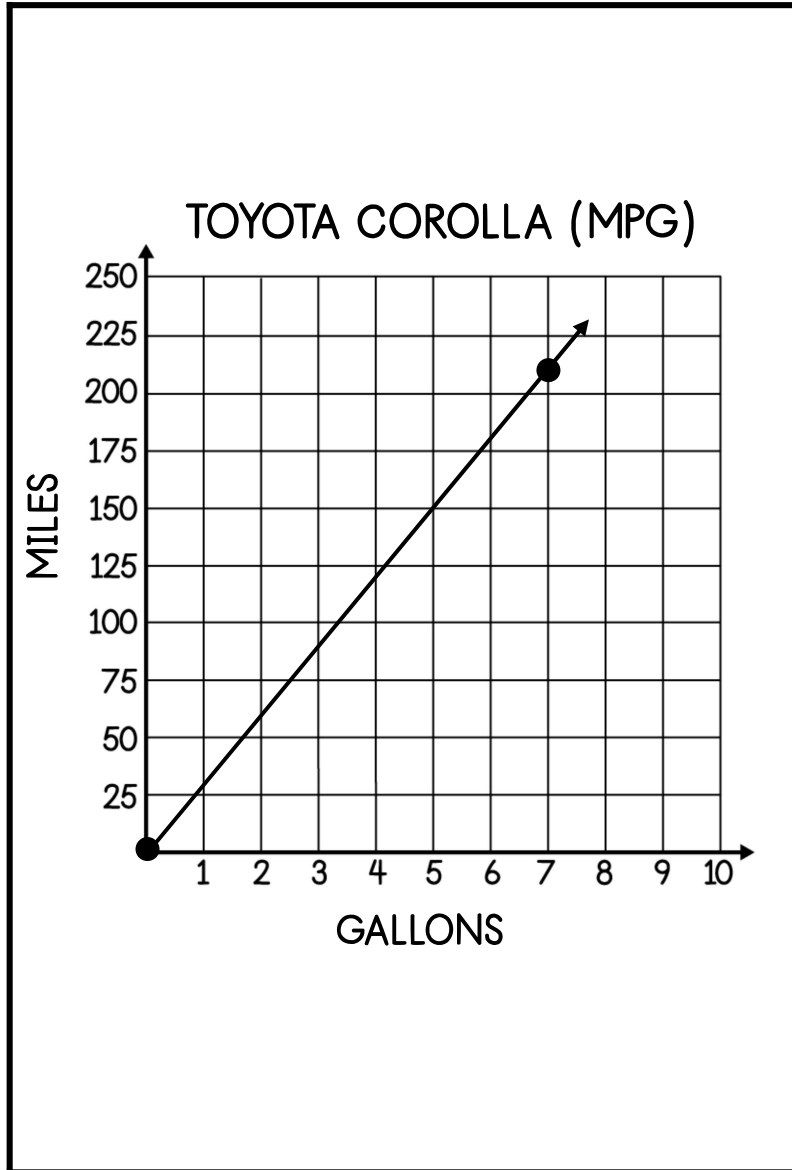

A video game developer projects that he will earn \$65.00 for every 5 games purchases. Write an equation to represent the proportional relationship between the number of games and the total earnings.

E

x	0	3	6	9	12
y	0	12	24	36	48

STATION 3

Use the graph to answer the questions below.

A

In this situation, what does the ordered pair $(0, 0)$ represent?

B

How can the constant of proportionality be represented with an ordered pair?

C

Write an equation to represent the gas mileage of the Toyota Corolla.

STATION 4

Use the table to answer the questions below.

STARBUCKS STORE
MANAGER WAGES

HOURS	\$ EARNED
2	\$27.00
4	\$54.00
6	\$81.00
8	\$108.00
10	\$135.00
12	\$162.00
14	\$189.00

A

The store manager earns \$310.50 in one week. How many hours did the manager work?

B

During November, sales are at their peak. The store manager must work 40 hours that week. How much will the manager earn?

C

Write an equation to represent the proportional relationship between the hours worked and the total earnings.

STATION 5

Write an equation to represent the proportional relationships below.

A

The cost of a 4 pack of apple juice is \$2.24. Write an equation that relates the cost in dollars, y , to the number of apple juice cartons, x .

B

A marathon runner is able to run 15 miles in 3 hours. Write an equation that relates the number of miles, y , to the number of hours, x .

C

A 12 ounce latte costs \$3.00. Write an equation that relates the cost in dollars, y , to the number of ounces, x .

STATION 6

Compute the unit rate for each of the items below.

44 oz
\$5.72

50 oz
\$6.00

32 oz
\$3.84

STATION 1

Compute the unit rate for each member of the football team below.

RUNS $\frac{1}{3}$ OF A MILE
EVERY $\frac{1}{4}$ HOUR

RUNS $\frac{5}{6}$ OF A MILE
EVERY $\frac{3}{4}$ HOUR

RUNS $\frac{3}{4}$ OF A MILE
EVERY $\frac{1}{2}$ HOUR

8 STATION

Change the recipe below so that it serves one.

CHICKEN POT PIE

$2\frac{1}{4}$ cups of pastry dough

$2\frac{1}{2}$ cups vegetables, chopped

$\frac{1}{4}$ of a cup of butter

salt and pepper to taste

$1\frac{1}{2}$ cups of chicken

*serves four
