

Compare Fractions by Benchmarking to One-Half

Shade each fraction below and then put a dotted line to show where $\frac{1}{2}$ would be. Sometimes it will be in the middle of a box. Then compare each fraction to $\frac{1}{2}$.

$\frac{3}{7} \bigcirc \frac{1}{2}$

$\frac{4}{6} \bigcirc \frac{1}{2}$

This fraction is
_____ than $\frac{1}{2}$.

$\frac{3}{7} \bigcirc \frac{4}{6}$

This fraction is
_____ than $\frac{1}{2}$.

This fraction is
_____ than $\frac{1}{2}$.

$\frac{5}{6} \bigcirc \frac{2}{9}$

This fraction is
_____ than $\frac{1}{2}$.

This fraction is
_____ than $\frac{1}{2}$.

$\frac{1}{4} \bigcirc \frac{2}{3}$

This fraction is
_____ than $\frac{1}{2}$.
