

Research Activity: Effects of Oil on Marine Life

Research:

Choose one of the organisms from the following list. After taking notes, use the space at the bottom of the page to explain how this organism is affected by oil spills in a few sentences. Be specific. Are their body systems harmed? Are their habitats harmed? Do they have an effect on the food chain as a whole?

- Jellyfish
- Sea turtles
- Brown pelican
- Fiddler crabs
- Sea otters
- Fish
- Oysters
- Aquatic and coastal vegetation

Notes:

Summary:
