

# Endangered Species Project

## Objective:

Explain the life history and ecological challenges of a local endangered species.

## Research:

Research a listed (endangered or threatened) species [from your state](#). Species not found in the US [are listed here](#).

## Be able to answer the following questions:

- Common and scientific name for the species
- What does it look like? (Find some pictures)
- Current geographic range of the species
- When was it listed?
- Threats to the species
- What conservation efforts are being used?
- How would this species' extinction affect other species?

## Presentation:

Create a way to educate other students about this species and how its populations are being threatened.

## Possibilities include:

- iMovie or video
- Poster
- Presentation
- Webpage or PowerPoint
- Other options provided by your teacher
