

Table 1: Use these Images for Question 7

Directions:

- Below you will find pictures of 15 different living organisms.
- These organisms can be grouped into the following categories: Producers, herbivores, omnivores, carnivores, and decomposers.
- Cut out the pictures below.
- Tape the pictures into the correct spaces for question 7 on your student answer sheets.

Table 2: Use these Images for Question 20

Directions:

- This table contains pictures of 12 different living organisms that live in three different ecosystems. The organisms can be arranged to form 3 different food chains. Cut out the pictures below. Tape the pictures in the correct ecosystem and in the correct order to form a food chain.

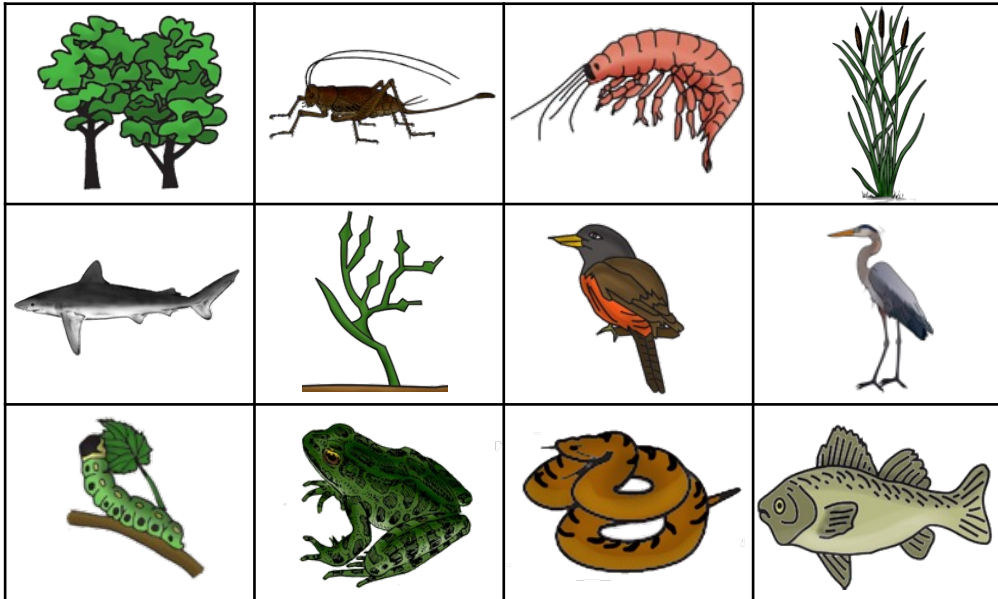

Table 3: Use these Images for Question 21

Directions:

- This table contains pictures of 12 different living organisms that live in three different ecosystems. The organisms can be arranged to form 3 different food chains. Cut out the pictures below. Tape the pictures in the correct ecosystem and in the correct order to form a food chain.

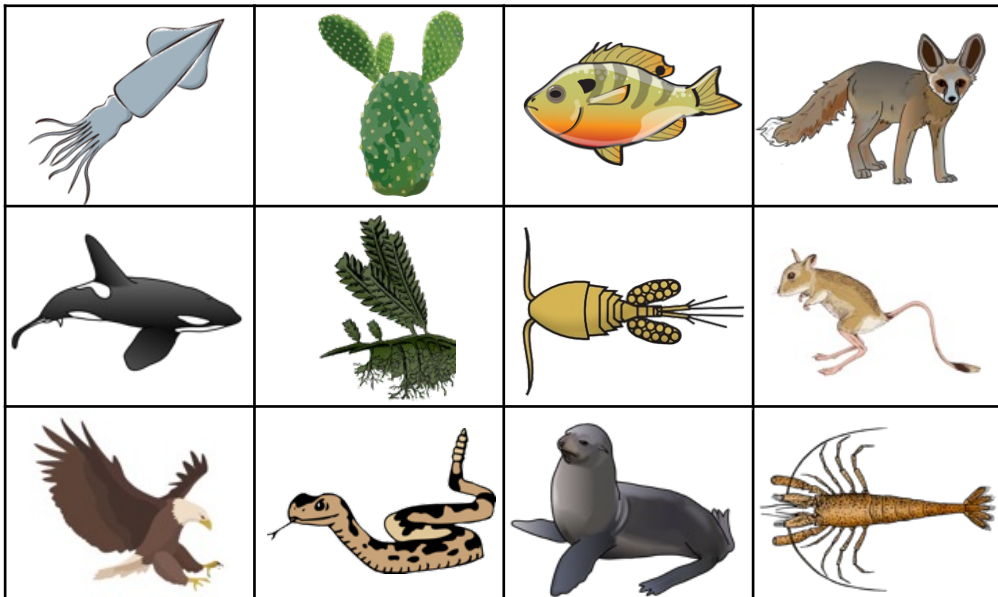

Table 4: Use these Images for Question 36

Directions:

- Below are organisms that can be linked together in a food web. Cut out the pictures and place them in the diagram in question 36 of your handouts. Take a marker and draw arrows between the organisms to show how they are related in a food web.
