

In 3-8, a pair of parallel lines is cut by a transversal. Set up and solve equations to find the marked angle measurements.

Equation: _____

Value of x: _____

Angle measures: _____

Equation: _____

Value of x: _____

Angle measures: _____

Equation: _____

Value of x: _____

Angle measures: _____

Equation: _____

Value of x: _____

Angle measures: _____

Equation: _____

Value of x: _____

Angle measures: _____

Equation: _____

Value of x: _____

Angle measures: _____

9. Use the parallel lines cut by a transversal to mark a-c as true or false. If false, correct the statement in the space below.

_____ a. The value of x can be found using $4x - 2 = 3x + 35$.

_____ b. The value of x = 21.

_____ c. Each of the marked angles measures 82° .
