# DECIMALS on a NUMBER LINE

1 Add a decimal and a zero in the tenths place to the whole numbers.

2 Now count from zero tenths to "10 tenths" which is 1.0 and label each tick mark.

3 Any time you need to find numbers *between* numbers, follow the steps above. It works with the hundredths place too!

0.   1

Finding Tenths

Add a decimal and a zero after the 1 and 2. Place the following points on this number line: A   1.2   B   1.7   C 2.1

1.   2

Finding Hundredths

Place the following points on this number line:

A   2.35   B   2.38   C 2.31

2.3   2.4
